

Minimum hole

The minimum hole drilled means the minimum drill size used for drilling a via.

The maximum package thickness for a 0.10 mm drill is 1.2 mm.
The maximum package thickness for a 0.15 mm drill is 1.6 mm.

After plating the diameter of the hole decreases to 0.05 mm.

Cross-section (i.e. microsection) of a plated 0.1mm hole.
